Role				
Bloodborne Pathogens	Summit's Bloodborne Pathogens-HC program was developed for use by the largest world health and disaster relief organization. Meet all compliance requirements with this motivating live-action video that includes a creative opening sure to grab workers' attention and hold their interest.	14:33	English	5/11/2009 5/12/2010
Bloodborne Pathogens for Healthcare	Bloodborne HC is designed for training employees in various industrial sites. Many employees encounter situations where infection from blood and other body fluids is a risk factor. This program is an essential employee safety component in this age of AIDS, Hepatitis, and other bloodborne diseases.	16:49	English	5/11/2009 5/12/2010
Bloodborne Pathogens for Healthcare	Summit's attention-grabbing program was filmed on-site, using real footage within the healthcare industry to accurately expose the possible hazards that may occur in the work environment. This program addresses that personnel within the industry should utilize "Standard Precautions," a combination of Universal Precautions and Body Substance Isolation. This means that all blood, body fluids, secretions, excretions (except sweat), nonintact skin, and mucous membranes may contain bloodborne pathogens. This program covers: What bloodborne pathogens are How to protect yourself Diseases that could be transmitted What to do if exposure does occur Potential exposure routes	16:50	Spanish	5/11/2009 5/12/2010

Combustible Dust: Incident Prevention	Summit's Combustible Dust Incident Prevention program will ensure to educate your employees on alertness of hazards and teach a commitment to following good housekeeping and safe work practice. This program covers: Hazards of combustible dust Safe work practices Preventing dust explosions Emergency procedures	12:13	English	5/11/2009 5/12/2010
Combustible Dust: Incident Prevention - Spanish	Summit's Combustible Dust Incident Prevention program will ensure to educate your employees on alertness of hazards and teach a commitment to following good housekeeping and safe work practice. This program covers: Hazards of combustible dust Safe work practices Preventing dust explosions Emergency procedures	12:15	Spanish	5/11/2009 5/12/2010
Compressed Gas Cylinders	Our Compressed Gas Cylinders safety program covers: Potential hazards Pre-use inspection and testing Best safety practices for handling and use Proper storage and transportation	13:13	English	5/11/2009 5/12/2010
Compressed Gas Cylinders - Arabic	Our Compressed Gas Cylinders safety program covers: Potential hazards Pre-use inspection and testing Best safety practices for handling and use Proper storage and transportation	13:12	Arabic	5/11/2009 5/12/2010
Compressed Gas Cylinders - German	Our Compressed Gas Cylinders safety program covers: Potential hazards Pre-use inspection and testing Best safety practices for handling and use Proper storage and transportation	13:12	German	5/11/2009 5/12/2010
Compressed Gas Cylinders - Mandarin Chinese	Our Compressed Gas Cylinders safety program covers: Potential hazards Pre-use inspection and testing Best safety practices for handling and use Proper storage and transportation	13:12	Mandarin Chinese	5/11/2009 5/12/2010
Compressed Gas Cylinders - Portuguese	Our Compressed Gas Cylinders safety program covers: Potential hazards Pre-use inspection and testing Best safety practices for handling and use Proper storage and transportation	13:12	Portuguese	5/11/2009 5/12/2010
Compressed Gas Cylinders - Russian	Our Compressed Gas Cylinders safety program covers: Potential hazards Pre-use inspection and testing Best safety practices for handling and use Proper storage and transportation	13:12	Russian	5/11/2009 5/12/2010
Confined Space Air Monitoring - Spanish	Use this video to teach workers the types of atmospheric hazards found in confined spaces, procedures for measuring those hazards and the proper use of air-monitoring equipment.	6:01	Spanish	5/11/2009 5/12/2010
Confined Space Entry: Emergency Rescue	A quick, efficient, pre-planned response to a confined space emergency is absolutely necessary for a successful rescue. Train your workers with this highly acclaimed training program filmed with one of the world's leading industrial companies. Every possible scenario rescue workers may encounter is presented with live-action footage. Your rescue team and emergency response personnel learn best safety practices and proven procedures to recover injured or incapacitated workers.	15:47	English	5/11/2009 5/12/2010
Confined Space Entry: No Time For Error	Summit's Confined Space Entry: No Time For Error features onsite footage and captivating graphics which grabs employee's attention and stresses the importance of hazard awareness when working in or around confined spaces. Exposing the dangers of confined spaces, Summit's training program provides workers with the knowledge of how to safely work within potentially hazardous conditions. Motivate your employees to follow best safety practices when working in or near confined spaces.	16:15	English	5/11/2009 5/12/2010
Confined Space Entry: No Time for Error - Spanish	The training materials covered in this program include: What is a confined space? Associated hazards	16:14	Spanish	5/11/2009 5/12/2010

	Proper entry procedures including permits, monitoring and PPE Attendant responsibilities			
Construction Safety Orientation - Spanish	This comprehensive program from Summit thoroughly covers a wide range of best safety practices for construction workers, including: PPE Ladder Safety Fall Prevention Hazard Recognition Hoists and Slings Scaffolding Safety Hazardous Materials Safety Electrical hazards Housekeeping Vehicle traffic Excavations Hot work	20:36	Spanish	5/11/2009 5/12/2010
Container Labeling: What You Don't Know Can Hurt You	Improper storage, mixing, or exposure to materials can result in serious injury and potential long-term effects. All employees who work with hazardous chemicals need training prior to handling them. Summit's Container Labeling program is an extremely comprehensive safety program that educates your workers on all aspects of container labeling. Filmed in multiple facilities, this program will improve your workers container labeling knowledge.	12:42	English	5/11/2009 5/12/2010
Contractor & Visitor Awareness	Teach your workers to understand the role of visitors' and contractors at your site, and the responsibility of your workers in regards to contractor and visitor awareness with Summit's informative training video. Identifying contractors/visitors The contractors/visitors role at your site Best practices for working with or around contractors/visitors	9:28	English	5/11/2009 5/12/2010
Contractor and Visitor Awareness - Spanish	Teach your workers to understand the role of visitors' and contractors at your site, and the responsibility of your workers in regards to contractor and visitor awareness with Summit's informative training video. Identifying contractors/visitors The contractors/visitors role at your site Best practices for working with or around contractors/visitors	9:29	Spanish	5/11/2009 5/12/2010
Contractor Safety: Chemical Processing Worker	Our 8-part series includes: (Process Safety Management Standard) Training requirements for process workers Limiting access to process areas Reporting incidents in the process area	6:03	English	5/11/2009 5/12/2010
Contractor Safety: Hazard Communications	Our 8-part series includes: Facility requirements for using hazardous chemicals Chemical labeling systems Material Safety Data Sheets	7:00	English	5/11/2009 5/12/2010
Contractor Safety: Permit Required Activities	Our 8-part series includes: Activities requiring a safe work permit Requirements for other specialized activities, including tunnel entry, roof access and compressed gas cylinder storage	10:47	English	5/11/2009 5/12/2010
Controlling Spills	Spills involving chemicals and hazardous materials can seriously injure your workers, while causing environmental and property damage. This engaging training program from Summit teaches your employees the procedures outlined in the Hazardous Waste Operations Regulation. Real-life examples in different work settings effectively demonstrate best safety practices for: Spill containment Cleanup Decontamination	13:24	English	5/11/2009 5/12/2010
Crane Safety: Overhead Operations	Crane operators are responsible for the crane, the item being moved, and most importantly, the safety of themselves and others working around the crane. There are currently 80,000 and 100,000 cranes being used in general industries. With this many cranes in use, there are approximately 250,000 crane operators and industry workers who are at risk of suffering serious injury or death in crane accidents each year. Summit's engaging, new training video uses high-end graphics and on-site footage to illustrate the dangers of overhead cranes if not operated properly. Following safe work practices and procedures is the only way to work safely with overhead cranes. This program includes cab controlled, pendant and wireless radio overhead cranes.	18:12	English	5/11/2009 5/12/2010
Decision Driving® Part 1: Positive Approach to Safe Driving	How do you become a Decision Driver? This overview provides you with the five principles which will improve your Decision Driving® performance and skills.	5:41	English	5/11/2009 5/12/2010
Decision Driving® Part 2: Expand Your Look Ahead Capacity	Reacting to a potential problem you see developing ahead, you may be able to avoid a full-blown hazard. Explains eight key steps to expanding your ability to see what's happening around you and where you will be driving in the next few seconds.	8:13	English	5/11/2009 5/12/2010
Decision Driving® Part 3: Size Up The Whole Scene	Teaches how to keep you constantly informed of the whole driving scene. The more facts you have, the smaller the chance of making a poor decision.	8:35	English	5/11/2009 5/12/2010
Decision Driving® Part 4:	Driving defensively is not enough, you have to make sure other drivers	9:02	English	5/11/2009

Road Rage	You've seen the news stories. Odds are you've witnessed it yourself, since nearly 80% of all drivers have been verbally abused by another driver. Road rage and aggressive driving have jumped off the headlines and into your morning commute. Experts predict they'll exceed drunk driving to become the leading cause of traffic accidents and fatalities. The odds of exposure increase dramatically for those who drive as part of their job. You can reduce the chances of your workers becoming part of the statistics by training with this program. It's timely, relevant and critical for sales representatives, service people, delivery drivers, and anyone else who spends time behind the wheel. Program covers: Effective advice to avoid getting involved with an aggressive driver What to do if you are the victim of aggressive driving The importance of avoiding aggressive driving yourself	15:00	English	5/11/2009 5/12/2010
Safe Behavior - No Regrets	Summit's Safe Behavior: No Regrets teaches workers to analyze everyday choices and actions so they can learn how to positively affect workplace safety. This highly motivational message helps your workers integrate safety into everything they do - reducing accidents and lowering costs. This engaging program covers: 1. Principles of behavior awareness 2. The power of positive reinforcement 3. The importance of interpersonal communication 4. How to make best safety practices a part of your everyday work practices	13:00	English	5/11/2009 5/12/2010
Safety Awareness: Don't Be A Dummy	Filmed in cooperation with the manufacturer of crash dummies, Safety Awareness will reduce incidents at your site by teaching your workers to respect hazards and develop positive attitudes towards safety. The creative presentation of critical safety topics will motivate your employees to: Accept personal responsibility for safety Inspect work areas and equipment for unsafe conditions Recognize and respect potential hazards Utilize personal protective equipment Follow safe work practices	11:21	English	5/11/2009 5/12/2010
Safety Orientation: It Begins With You	This compelling training program helps develop a respect and understanding for potential hazards found on the job by explaining to your employees that safe work practices and procedures are established for their safety. This program supports your positive safety culture by addressing a wide range of safety topics: Personal protective equipment Good housekeeping procedures Hazard communication Ergonomic awareness Emergency evacuation procedures Chemical safety Signs, placards and labels	14:44	English	5/11/2009 5/12/2010
Safety Orientation: It Begins With You - Italian	This compelling training program helps develop a respect and understanding for potential hazards found on the job by explaining to your employees that safe work practices and procedures are established for their safety.
